You tell Guiide what you want in actual money each year after tax

Here's what you want

You want to retire in May 2023.

You want a starting income of £25,000 in retirement, plus an additional £2,000 for the first five years.

Your income will increase with inflation during retirement.

You tell Guiide what you have to put towards retirement, including all of your pension pots you will take an income from when you choose

State pension

Your State Pension Age is January 2031. Your estimated pension from this date is \pm 11,494 per annum.

Pension pots

Pension Pot 1 - estimated value at May 2023 £131,111.

Pension Pot 2 - estimated value at May 2023 £69,215.

Pension Pot 3 - estimated value at May 2023 £80,750.

Salary pensions

Salary Pensions 1 - a total starting pension of £5,000 per year from May 2028.

✓ £5,000 a year increasing at 3%.

Savings pots

Savings Pot 1 - estimated value at May 2023 £23,990.

Other cash

Other Cash 1 - a payment of £50,000 on May 2022.

Any other income

No other income defined.

You tell Guiide if you want to set any money aside to pass on, or use only if things do not turn out as expected and how you expect your pension and savings pots to increase

Assumptions								
How much Protected	, ,	on pot do you not want to touch	1? 🕜					
_	£20,000	+						
		ur money to grow each year? (3					
How do y Savings		ur money to grow each year?	9					
	Pot 3.0%	ur money to grow each year?	9					
Savings	Pot 3.0%	ur money to grow each year?	3					

Guiide then puts everything together. It shows you how to take money from your total savings and pension pots each year (or month) to expect to get exactly what you want after tax, so you can control your own money in retirement
